Great smiles start with our
state-of-the-art dental
implant treatment

Robotic-assisted dental implant technology

What you should know:

The information provided herein is not meant to substitute for the in-depth consultation you should have with your dentist. Only a licensed dentist can adequately diagnose and explain your underlying condition, Yomi Robot-Assisted Dental Surgery, medically acceptable alternative procedures, and the potential complications and risks of any procedure and/or operation. In every case your dentist must guide you on all aspects of your surgery, including pre- and post-operative care. Individual results will vary.

All claims of product performance and indications for use contained within this document relate only to data submitted to and reviewed by regulatory authorities in those jurisdictions in which clearance(s) and/or approval(s) have been obtained, including the United States. No product performance claims or indications for use are made for jurisdictions in which such clearance(s) and/or approval(s) have not been obtained.

yomi
BY NEOCIS

Yomi® is the first and only FDA-cleared robot-assisted dental surgery system. Yomi is a computerized navigational system intended to provide assistance in both the planning (pre-operative) and the surgical (intra-operative) phases of dental implantation surgery. The system provides software to preoperatively plan dental implantation procedures and provides navigational guidance of the surgical instruments. Yomi is intended for use in partially edentulous and fully edentulous adult patients who qualify for dental implants.

Your brighter future + Our better solution
Introducing robotic-assisted
dental implant technology

More precision | Smaller incision | Life-changing results

Say hello to Yomi®

As the first and only robotic-assisted surgical system cleared by the FDA for dental implant surgery, Yomi® helps your team of specialists accurately plan your procedure and place your implants. Whether you need to replace a single tooth, multiple teeth or your complete smile, this is the less invasive, life-changing solution you've been waiting for.

Here's why Yomi may be the best option for you:

- **Enables smaller incisions + faster recovery:** Yomi enables minimally invasive procedures, which could lead to a faster recovery.
- **Robotic guidance + control:** Your doctor is always in control with Yomi assisting in the accurate placement of the implants according to the digital plan.
- **Digital planning + accuracy:** Yomi complements your doctor's surgical skills by pre-planning the entire procedure and enabling robotic guidance throughout the surgery.
- **More peace of mind + saves time:** Implants are an investment, so it feels good knowing you're getting more accurate dental care with fewer appointments (for the appropriate candidates).
- **Great smile + life-changing results:** Dental implants look, feel and function like real teeth, helping you take control of your oral health now and for the future.

Your surgeon is always in control

Yomi technology combines your dental surgeon's skills with the benefits of robotics by providing helpful assistance. It does not replace your surgeon; Yomi simply enhances your experience.

Minimally invasive procedure

If you want a less invasive dental implant solution, you may be a candidate for Yomi robotic-assisted surgery. And this technology can mean smaller incisions, faster recovery time and lifelong results.

Better care for a brighter future

More and more specialists all over the country are embracing robotic-assisted dental implant technology because it brings a new level of care to patients like you. From efficient treatment schedules to a customized plan, Yomi helps ensure you get the smile you deserve.

"This is absolutely amazing from a technical aspect. Nobody wants to go to the dentist, but I'd even say my experience was enjoyable. It was seamless, it was painless for me, and most important, you helped me understand the technical aspect behind it. You guys are awesome, I appreciate you."

- Gerard, Yomi patient

"Because of Yomi, my dental surgeon was able to do it all at once...it saved four months' time and the cost of having to come in for a second appointment. I'm very happy with the experience"

- Kathleen, Yomi patient

Ask your dental specialist if Yomi is right for you

Discuss all treatment options with your dental provider. Your dental team will look at your medical and dental history, and then recommend a good option for you.
